

Onur Ravli Backend Developer

onur@onurravli.com • onurravli.com • linkedin.com/in/onurravli • github.com/onurravli

Summary

Software developer with strong experience in designing and building scalable, type-safe, and production-ready applications across both frontend and backend. Proficient in TypeScript and Node.js for backend systems, and React / Next.js for modern, high-performance user interfaces. Experienced in system architecture, distributed systems, and microservices, with a focus on clean code, maintainability, and end-to-end ownership of products. Passionate about building robust platforms that balance engineering excellence with real business impact.

Experience

- Insider One. (Istanbul, Türkiye)**
Software Developer

Remote
July 2025 – Present

 - Designed and developed backend and frontend components of the Use Case Library platform using TypeScript, Node.js, and Next.js.
 - Contributed to system architecture and feature development within the Optimus ecosystem.
 - Conducted code reviews, ensuring high code quality and maintainability standards.
- JotForm. (Ankara, Türkiye)**
Summer Intern

Remote
August 2023 – September 2023

 - Developed a revision history system for Jotform Approvals using Node.js, React, PHP, and MySQL.
 - Worked in a collaborative team environment following modern development workflows.
- Üstünova Engineering. (Ankara, Türkiye)**
Summer Intern

Ankara, Türkiye
July 2023 – August 2023

 - Built dashboard and control panel interfaces for EV charging station software (Electr-INN).
 - Integrated frontend (Next.js) with backend services (Node.js, Django).

Projects

- LibreSuite (Open-Source Modular Collaboration Platform)**
Founder & System Architect

2025 – Present

 - Architected a modular, open-source collaboration platform built as a monorepo using Turborepo and pnpm workspaces.
 - Designed and implemented event-driven microservices architecture using Node.js, TypeScript, and Kafka for inter-service communication.
 - Developed multiple services (auth, users, workspaces, projects, tasks, notifications) each with isolated Prisma schema and PostgreSQL database.
 - Implemented API Gateway pattern for centralized routing, authentication, and service orchestration.
 - Containerized all services using Docker and Docker Compose with environment-specific configurations.
 - Enforced end-to-end type safety across backend, frontend (Next.js), and database layers.
 - Designed scalable system patterns focused on maintainability, domain separation, and clean architecture.

Skills

Languages: TypeScript, Go, Python, Java
Backend: Node.js, Express.js, Nest.js, Django, Spring Boot, REST APIs, GraphQL, Kafka, RabbitMQ
Frontend: React.js, React Native, Next.js, Tailwind CSS
Databases: PostgreSQL, MongoDB, MySQL, Redis
Cloud & DevOps: Docker, Docker Compose, AWS (EC2, Lambda, S3)
Testing & Tools: Jest, Postman, Swagger, Git

Education

Konya Technical University
B.Sc. in Computer Engineering

Konya, Türkiye
September 2022 – June 2026

Scholarships

TÜBİTAK
Scholarship Holder, Researcher

Türkiye
April 2023 – October 2023

- Conducted research on explosive circuit detection from X-ray images using ensemble and deep learning techniques.
