Onur Ravli Full-Stack Developer

onur@onurravli.com • onurravli.com • linkedin.com/in/onurravli • github.com/onurravli

Summary

Software developer delivering scalable, type-safe web and cross-platform applications. Leverages AI-powered workflows to accelerate development cycles, automate boilerplate, and enhance code maintainability. Specialized in the Node.js ecosystem with a solid track record of collaborating with remote, international teams. Adept at tackling complex technical challenges, from integrating medical imaging workflows to designing efficient backend architectures. Focused on writing maintainable, clean code that bridges robust system design with practical product needs.

Experience

Software Developer at Insider One (Istanbul, Türkiye) July 2025 – Present

- Supported 900+ global partners (including Singapore Airlines, AirArabia, Turkish Airlines, Samsung, ING, Allianz, IKEA, and more) by delivering user-facing web application features end-to-end in an agile cycle.
- Conducted code reviews, ensuring high code quality and maintainability standards.
- Delivered real-time technical guidance in live international client sessions, translating technical issues into clear, actionable solutions for enterprise stakeholders.

Full-Stack Engineer at Acanio, LLC. (Orlando, FL) February 2025 – May 2025

- Developed cross-platform applications for medical imaging using React, React Native, and Electron, enabling richer DICOM image viewing and processing.
- Optimized DICOM/DCM image processing and rendering performance across web, mobile, and desktop platforms, contributing to a unified codebase shared between codebases.

Full-Stack Engineer at Doc Design Ltd. (Istanbul, Türkiye) March 2024 – October 2024

- Built applications using Node.js, Strapi.js, React Native and Electron, focusing on innovative media and educational publishing platforms.

Summer Intern at JotForm (Ankara, Türkiye) August 2023 – September 2023

- Developed a revision history system for Jotform Approvals using Node.js, React, PHP, and MySQL in a collaborative team environment.

Summer Intern at Üstünova Engineering (Ankara, Türkiye) July 2023 – August 2023

- Built a dashboard and a control panel interface for EV charging station software, Electr-INN, using Next.js and Django.

Skills

Programming Languages: TypeScript, JavaScript, Python
Backend Tools: Express.js, Nest.js, GraphQL, Supabase
Frontend Tools: React.js, Next.js, Tailwind CSS, React Native, Expo, Electron & Tauri
Databases: PostgreSQL, MongoDB, MySQL, Redis
Cloud & DevOps: Docker, Docker Compose, Core AWS Services, Terraform & Terragrunt
Other Tools: Jest, Postman, Swagger, Git, Claude Code, Cursor, Vercel SDK

Projects

Voltran A local control room for running many coding agents and terminals at once. *(Node.js, React, WebSocket, xterm.js)*
Altab A premium, lightweight window switcher for macOS, alternative for a paid one. *(Swift, SwiftUI)*
LocaLLM Local first LLM-based development suite. *(Next.js, LM Studio)*
Mapino Map based social mobile application. *(Swift, Supabase, Express.js)*
Bowie Language Dynamically typed, interpreted scripting language written in C. *(C, Make)*
Flottant A browser-based DAW (Digital Audio Workstation). *(Next.js, Web Audio API)*

Education

Konya Technical University Konya, Türkiye
B.Sc. in Computer Engineering September 2022 – Present
Konya Technical University Konya, Türkiye
B.Sc. in Electrical & Electronics Engineering (Undergraduate Transfer) September 2020 – June 2022

Scholarships

TÜBİTAK (The Scientific and Technological Research Council of Türkiye) Türkiye
Researcher & Scholarship Holder April 2023 – October 2023
